

Overview

Fiberglass duct rodder Ø3mm with PP outer coating spooled in black electrostatic powder coating steel cage 330mm.

Construction

It comes with threaded starting/ending joints M5 (AKAT194) and interchangeable terminals M5 : flexible starting spinner with eyelet (AKAT501), eyelet (AKAT222), starting roller (AKAT076) and connection joint (AKAT078).

Usage

Ideal tool for plasterboard & suspended ceilings usage and pipes from Ø16mm to Ø32mm.

Notes

- Apply some light glue at the interchangeable terminals for safety before usage.
- Apply cable lubricant for maximum efficiency during installation.
- Pay attention at the safety instructions and manual, before using the tool.

Technical Specifications

Color	blue
Material	fiberglass core with PP outer coating
Tolerance	±0.10mm
Min. bending radius	50mm
Breaking Strength	up to 480kg
Pulling strength	up to 100-120kg

Available lengths (art.no.)

- 20 m — AKAT148
- 30 m — AKAT149
- 50 m — AKAT150

Pipe diameter
Ø MAX. 16-32mm

Breaking Strength
480kg

MIN. Bending radius
50mm

Pulling Strength
100-120kg
