

### Περιγραφή

General purpose" is a bi-component silicone filler for electrical connection boxes.

It seals junction boxes to ensure and protect electrical connections, from external environmental factors such as dust, humidity e.t.c.

It is a soft gel with low viscosity, ready to use.

### Χρήση

Mix the two components in the measuring cup in a 1:1 ratio for at least 15 sec. Place the final mix directly in the connection box to seal it and wait approximately 10 min. for polymerization.

### Notes

- After usage keep the product sealed and away from sunlight and the mixing equipment clean.
- Store the product at a temperature below 40° C.

### Product Packaging Dimensions

Bottles of : 1kg (500 gr part A + 500 gr part B)

(Art. No)

**100-50-701**

Features	Mean
Color	transparent
Texture	gel
Smell	none
Dielectric strength	9kV/mm
Specific weight	0,98 gr/cm3

Bio-degradable

Non-flammable

Non-toxic

-15°C - +50°C  
Safe temperature
