

Overview

Comfy" is a soft gel filler for electrical connection boxes. It seals junction boxes to ensure and protect electrical connections, from external environmental factors such as dust, humidity e.t.c. It is a soft gel with low viscosity, ready to use. Ideal for the long-term insulation of electrical equipment.

Usage

Pour the gel by hand or with the practical tube and cover the connection box till the top. Make sure that the box has no holes or openings, otherwise repair the junction box first. The box must be entirely filled with the gel to achieve the desired insulation.

(Art. No)
100-50-702

Features	Mean
Color	transparent
Texture	gel
Smell	none
Dielectric strength	9kV/mm
Specific weight	0,98 gr/cm3

Bio-degradable

Non-flammable

Non-toxic

-15°C - +50°C
Safe temperature
